

HEARING TESTS

are required for all noise exposed workers

*...and we can come to
you*

*Canary North is now able to provide a
mobile hearing test service, bringing
convenient regulatory compliance to your
doorstep.*

This service is cost effective, convenient, and
minimises interruption to your business as we
come to you.

State of the art equipment and noise excluding headset allows us to provide screening audiometry for your workers, according to Australian Standard AS1269. Test results are displayed on the computer screen giving your worker immediate feedback on their result and awareness of the importance of protecting their hearing. A hearing assessment report is provided for each individual, along with a workgroup summary for management. More detailed reporting and training is available – we can customise a package to suit your workplace requirements.

For more details, or to book a visit, call Trini or Peter on (07) 47797476 or 0412473126
